PMX Product Line Discontinuation Notices

Dear valued customers and distributors:

Nippon Pulse America, Inc. (NPA) submits to you the following notifications regarding the future manufacture and sale of some of the Performax (PMX) box controllers.

- **PMX-4EX-SA-TB9 and PMX-4ET-SA-TB9**
 - To simplify the Performax product line, NPA will no longer manufacture the -TB9 versions of the PMX four-axis box controllers. The -TB9 versions will continue to be sold until current inventory supplies are depleted. After that time, NPA will continue to provide support for this product, and will honor all warranties.
 - NPA recommends the -TBS versions of these controllers for integration into new applications. PMX-4EX-SA-TBS and PMX-4ET-SA-TBS will continue to be manufactured, with no plan for future discontinuation.
 - -TBS versions of the PMX can easily be used in any application that currently utilizes a -TB9 controller, as all software and firmware for the -TBS and -TB9 versions of the controllers are 100% compatible.
 - The motor connection is the only wiring difference between the two box versions. Our applications engineers are happy to provide technical assistance as needed.
- **PMX-4CX-SA**
 - The PMX-4CX four-axis box controller has been discontinued. This product will no longer be manufactured for new or existing applications. NPA will continue to provide support for this product, and will honor all warranties.

If you have any questions, please feel free to contact our sales representatives.

Sincerely,

Jerame Chamberlain

Vice President of Sales
