**SUBJ: SL083 Discontinuation Notice**

Dear Valued Customer:

You are receiving this letter because our records show that you have purchased the SL083 within the past five years. The SL083 is our linear shaft motor with built-in encoder. Due to issues with obtaining the components to make this motor, it is being discontinued effective immediately. This does not apply to the motor used to make the SL083, the S080T.

**Replacement Item**

There is no replacement item. However, the S080T linear shaft motor is available for purchase for use with an external encoder.

**Reason**

Aside from the S080T (which is still available), the factory is no longer able to acquire the parts to manufacture the SL083.

**Final Orders**

As of March 25, 2020, Nippon Pulse America, Inc., has five pieces of the SL083 available. Once those have been sold, we will not be able to obtain any others from the factory. To place an order, please contact Julie Kalchik at 540-633-1676 or [jkalchik@nipponpulse.com](mailto:jkalchik@nipponpulse.com).

**Technical Assistance**

Please have the responsible engineer contact our application engineers at 540-633-1677 as soon as possible so that we can assist you with the discontinuation.

Best regards,

Robert White
