PMX Product Line Discontinuation Notices

Dear valued customers and distributors:

Nippon Pulse America, Inc. (NPA) submits to you the following notifications regarding the future manufacture and sale of some of the Performax (PMX) box controllers.

- **PMX-4EX-SA-TB9 and PMX-4ET-SA-TB9**
 - In an effort to simplify the production of the Performax product line, NPA will no longer manufacture the -TB9 versions of the PMX four-axis box controllers after the existing inventory supply is depleted. The -TB9 versions will continue to be sold until such time as current inventories are depleted. After that time NPA will continue to provide support for this product and will honor all warranties.
 - NPA recommends the -TBS version of these controllers for all new designs. The -TBS versions of these products will continue to be manufactured with no planned discontinuation.
 - The -TBS version can easily be used in all application which the -TB9 was used.
 - All software and firmware are 100% compatible between the -TB9 and -TBS version.
 - The only wiring difference is the motor connection. Any of our application engineers will be happy to assist you with this change.
- **PMX-4CX-SA**
 - Due to the discontinuation of a major component, the PMX-4CX four-axis box controller has been discontinued. This product will no longer be manufactured for new or existing applications. NPA will continue to provide support for this product, and will honor all warranties.

If you have any questions, please feel free to contact our sales representatives.

Sincerely,

[SIGNATURE]

Jerame Chamberlain

VP of Sales
